

WELCOME TO THE PATIENT PORTAL

The doctors and staff of The Pediatric Center wish to welcome you to the Patient Portal. The Patient Portal will provide another method of communication between the office and you using your computer and the internet. It will be used only for **non-critical** means of communication. You will be able to access information such as appointment reminders, lab results, clinical summaries of your visits, referrals, school excuses, health reminders, and many other forms. You will now also be able to request an appointment, ask a question, or request a medicine refill.

You will be sent one invitation to the e-mail address that you provide. The invitation will contain a secure link to our Patient Portal where you can create one account for access to **all of your children's** information. (You will not have complete access to your child's medical record, just to the information that has been sent by our facility.) As information is transferred to the Patient Portal, you will receive an e-mail message alerting you to the new information. All communication will be encrypted so your information will be secure.

Today's Date: _____

		Your Relation to this child:		
Child's Name:	DOB:	MOM	DAD	Legal Guardian
